

Case Report Article Assessment Form

ID Manuscript : 729/LK/XII/JNI/2025

Title : Ultrasound-Guided Scalp Block as an Anesthetic Technique And Postoperative Analgesia for Awake Cranioplasty In High-Risk Patients: A Case Report

No	Item Study	Reviewer Suggestions
1	Is the writing system appropriate? 1) For Case Reports: Title, Abstract, Abstract, Introduction, Case, Discussion, Conclusion, Bibliography. The discussion is to create solutions to the problems that occurred in the case? 2) The abstract is written in English in no more than 250 words.	Yes
2	Is the use of English good and correct?	It is necessary to improve the use of English, especially diction (correct words), sentence structure, sentence effectiveness and the relationship between paragraphs.
3	Is the title concise enough and can clearly describe the content of the article?	Yes
4	Is the abstract concise enough, proportional, IMRAD, and can clearly describe the content of the article?	It doesn't really seem to follow IMRAD, the abstract section needs to be revised to make it easier for readers to understand the contents of the article.
5	Does the introduction clearly outline the topic?	Yes
6	Has the Case Section clearly explained the Anamnesis, Physical Examination, Lab Examination and other support such as CT-scan, MRI, Anesthesia and Post-operative Management.	Yes
7	Has monitoring during surgery and/or post-surgery been carried out? (can be a table or graph)	Yes
8	Is the conclusion presented briefly and clearly?	Yes
9	Is the writing already based on Vancouver?	Yes

No	Decision	Check (v)
1	Articles can be loaded without changes	
2	Articles can be published with improvements (please write an outline of the revisions on a blank sheet)	v
3	Articles can be considered for submission to international journals	
4	Article could not be loaded
