| 1  | <p>Is the writing system appropriate?</p> <p>1) For Case Reports: Title, Abstract, Abstract, Introduction, Case, Discussion, Conclusion, Bibliography. The discussion is to create solutions to the problems that occurred in the case?</p> <p>2) The abstract is written in English in no more than 250 words.</p> | <p>1). Case Report Structure<br/>The manuscript is not organized according to CARE guidelines (please kindly check it). Yes, the purpose of the Discussion section is to analyze the clinical issues presented in the case and propose evidence-based explanations and possible solutions. The discussion should contextualize the case within the existing literature and highlight what can be learned from it.</p> <p>2) yes, the abstract is written in English in no more than 250 words.</p> |
| 2  | Is the use of English good and correct?                                                                                                                                                                                                                                                                             | Yes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 3  | Is the title concise enough and can clearly describe the content of the article?                                                                                                                                                                                                                                    | Yes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 4  | Is the abstract concise enough, proportional, IMRAD, and can clearly describe the content of the article?                                                                                                                                                                                                           | the abstract is currently not written in a clear, coherent, and structured manner. It should succinctly summarize the background, key clinical features, interventions, outcomes, and the significance of the case. Please revise the abstract to improve its clarity and readability.                                                                                                                                                                                                             |
| 5  | Does the introduction clearly outline the topic?                                                                                                                                                                                                                                                                    | yes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 6  | Has the Case Section clearly explained the Anamnesis, Physical Examination, Lab Examination                                                                                                                                                                                                                         | yes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

### Suggestions:

The manuscript is not organized according to the CARE guidelines, and therefore requires substantial structural revision. In addition, the abstract is not written in a clear, coherent, or well-structured manner. It should succinctly summarize the background, key clinical features, interventions, outcomes, and the overall significance of the case. Please revise the abstract to improve its clarity and readability.

The bibliography also needs improvement. Several references are not formatted according to the Vancouver style, and some sources are more than five years old. Please revise and update the references to ensure accurate Vancouver formatting and the inclusion of more current, evidence-based literature.
